Task Management System

Installation

To get started with this project, follow these steps:

1. Clone the GitHub repository:

   git clone https://github.com/Hnour09/TaskMangementSystem

2. Install the necessary Node.js modules:

   npm install

API Documentation

Swagger Documentation

We use Swagger for API documentation. You can access the API documentation by running the project and visiting **/api-docs** in your web browser.

Example: http://localhost:4000/api-docs

Testing

We use Mocha for testing. To run the test cases, use the following command:

npm test

Make sure to add details about how to write and run tests in your project.

Docker

This project includes a Dockerfile for containerization. You can build and run a Docker container
